

**L<sup>1</sup> TECHNOLOGIES**

**FOR IMMEDIATE RELEASE**

**iGolf GPS Caddie From L1 Technologies is Awarded  
Golfing Magazine's 2006 Player's Choice Award**

**San Diego, California, December 4, 2006** – L1 Technologies' iGolf GPS Caddie has won the 2006 Player's Choice Award for New Golf Technology from Golfing Magazine. The handheld GPS device is the preferred GPS distance finder of the Amateur Golfers' Association (AGA) and was acknowledged for its user-friendly interface and for providing information quickly and accurately.

“We are happy to see that Golfing Magazine's readers feel that the iGolf GPS Caddie is the ideal tool to help them lower their handicaps and make the game more enjoyable,” said David Alexander, Vice President of Sales for L1 Technologies. “With the iGolf GPS Caddie, golfers can focus on shot strategy and club selection without having to spend time looking for yardage markers and pacing off their distance.”

The iGolf GPS Caddie provides golfers with instant distance information to the front, center and back of the green, as well as up to eight custom points on each hole (e.g. hazards, lay-up targets, etc). Files for thousands of golf courses can be downloaded from iGolf.com and customized to a golfer's specific desires. Additionally, an integrated 'Shot Distance' feature allows golfers to determine and track exactly how far they have hit each club.

The iGolf GPS Caddie is available at pro shops and golf specialty stores across the country. At a retail price of only \$229.99, it is the most affordable GPS device on the market- and an ideal gift for golfers this holiday season.
