**iGolf GPS Caddie Recognized as One of the
“20 Coolest Gizmos of 2007” by *go* Magazine**

San Diego, California, January 11, 2007 – The December edition of *go*, the in-flight magazine of AirTran Airways, has named the iGolf GPS Caddie as one of the “20 Coolest Gizmos” of the year. Its user-friendly interface and quick and reliable accuracy are just two reasons *go* declared that the iGolf GPS Caddie makes “your fun time more enjoyable”.

“It’s great to see the iGolf GPS Caddie being recognized as a device that can enhance your golfing experience,” said David Alexander, Vice President of Sales for L1 Technologies. “The Caddie assists with yardage and club selection in a user friendly manner, making the game that much more pleasurable.”

The iGolf GPS Caddie provides golfers with instant distance information to the front, center and back of the green, as well as up to eight custom points on each hole (e.g. hazards, lay-up targets, etc). Files for thousands of golf courses can be downloaded from www.iGolf.com and fully customized to a golfer's specific desires. Additionally, an integrated 'Shot Distance' feature on the GPS Caddie allows golfers to determine and track exactly how far they hit each club. The iGolf GPS Caddie is available at the iGolf.com online store, pro shops and golf specialty stores across the country. It retails for \$229.99, making it the most affordable GPS device on the market.

The complete article featuring the iGolf GPS Caddie and 19 other cool gadgets is available online at the AirTran Magazine website.
