

iGolf GPS Caddie Earns GolfTest USA Seal of Excellence

Independent testing company gives Caddie highest marks after extensive testing

San Diego, California, April 5, 2007 – The iGolf GPS Caddie, a handheld golf GPS device that provides golfers with the distance to the front, center and back of the green, has been recognized by an independent golf testing company as a high quality product. GolfTest USA, a company that reviews and rates golf related products and services, has awarded the the GPS Caddie with its “Seal of Excellence”, affirming that it is a golf product of superior performance, quality and value.

“We had several golfers use the GPS Caddie and report their experience to us,” explained Wayne Williams, GolfTest USA’s Testing Director. “Everyone indicated that the Caddie was very accurate and saved them a lot of time not having to hunt around for yardage markers. In addition, the users found that the device was easy to program and operate on the course.”

In addition to providing the distances to the green, the Caddie allows users to add up to eight custom points per hole and measure the distances of drives and other shots during the round. The GPS Caddie retails for \$229.99 and is available at www.iGolf.com and retailers across the country.

About GolfTest USA

GolfTest USA was formed so golf consumers will have one website to visit to get independent and unbiased information enabling them to make informed purchasing decisions for all golf related products. The categories include golf clubs, balls, accessories, training aids, apparel, golf schools and golf resorts. GolfTest USA aims to be considered the "Consumer Reports" of the golf industry.
