

FOR IMMEDIATE RELEASE

iGolf Nears Completion of GPS Golf Course Mapping in Canada

San Diego, California, June 18, 2008 – The L1 Technologies brand, iGolf, has announced they are near completion of GPS golf course mapping in Canada. With the bulk of the Canadian courses completed, a golfer living in or traveling to Canada should be able to find most of the courses they are hoping to play. While iGolf continues to map in Canada, the courses that have already been completed are available for immediate download at no additional cost to members of iGolf.com.

“We are pleased to have expanded our GPS database to include the majority of Canadian courses”, said Patrick Nichols, Project Manager, L1 Technologies, iGolf Division. “iGolf.com already hosts an extensive, world-wide database, however we are now focused on returning to various areas to offer a greater number of courses in the popular golfing regions.”

With a wide variety of golf courses, spanning the globe already mapped, and the option to request a course to be mapped, iGolf members have been offered many advantages over their competitors. Paid membership to iGolf.com is \$34.99 for 1 year access and 100 course downloads that are stored on your hard drive and never expire. By including access to their world-wide database for all members, iGolf is working very hard to stay on top.

In addition to GPS course download files, iGolf.com is also a destination site for avid golfers. Here, golfers can look up the green fees, dress code, scorecard, weather report and other golfer's comments for their favorite golf course or read the latest golf headlines and golf equipment, course and travel reviews. The free iGolf Handicap Tracker records scores to help players establish their handicap. Please visit www.igolf.com for more information on our golf course database, membership, and products.

About L1 Technologies, iGolf Division

L1 Technologies, founded in 2003, has positioned itself as a leading innovator in the GPS technology sector by focusing on research and development of cutting edge products for the civilian industry under different divisions, One Navigator and iGolf. The iGolf division markets mobile GPS golf products including the GPS Caddie, GPS Caddie II, iGolf Neo and iGolfGPS software. iGolf.com, the world's largest GPS golf course database, offers members access to GPS course files for their iGolf products. Members of iGolf.com also have access to a free handicap tracker, golf news and product, travel and course reviews as well as, golf course information.
