

FOR IMMEDIATE RELEASE

iGolf GPS Caddie II Earns GolfTest USA Seal of Excellence

Independent testing company gives GPS Caddie II highest marks after extensive testing

San Diego, California, May 29, 2008 — The iGolf GPS Caddie II has been recognized by an independent golf testing company as “a golf product of superior performance, quality and value”. GolfTest USA, a company that conducts independent, non-bias reviews and rates golf related products and services, has awarded the iGolf GPS Caddie II with its “Seal of Excellence”. The iGolf GPS Caddie II is the second handheld GPS device for golf introduced by the iGolf brand. The iGolf GPS Caddie, its predecessor, earned the same award in 2007, making the first two products developed by the same company worthy of the “Seal of Excellence” distinction.

“GolfTest USA recently tested iGolf’s newest GPS unit, the iGolf Caddie II, which replaced the original Caddie. It is a full featured golf GPS that has several new improvements and features” Wayne Williams, Testing Director at Golf Test USA. “Its price remains considerably lower than any other comparable golf GPS and is the best value for the cost conscious golfer that we have seen currently on the market.”

In addition to all of the qualities featured in the original iGolf GPS Caddie, the GPS Caddie II has an updated user interface and improved ease of use, while maintaining the same low price, for which iGolf has become synonymous. The iGolf GPS Caddie II suggested retail is \$229.99 and is available at www.iGolf.com, as well as retailers across the country.

About GolfTest USA

GolfTest USA was formed so golf consumers will have one website to visit to get independent and unbiased information enabling them to make informed purchasing decisions for all golf related products. The categories include golf clubs, balls, accessories, training aids, apparel, golf schools and golf resorts. GolfTest USA aims to be considered the "Consumer Reports" of the golf industry.
